What a blocked page looks like

 **ChinaReady**

Stack Break Lab

Executed on launchready.cn mainland China infrastructure

MAPS, MEDIA, EMBEDS

Google Maps.

Loads the Google Maps JavaScript API from `maps.googleapis.com` and tries to render a map of Shanghai.

● Dependency failed to load — timed out after 8s

If Maps is blocked, the box above stays grey and never tiles.

Dependency

Loads from

Expected in China

Google Maps

`maps.googleapis.com`

The map is a grey box that never tiles, or an infinite loading spinner, because the Maps JS API is unreachable.

AUTH AND IDENTITY

Google Sign-In.

Loads Google Identity Services from `accounts.google.com` — the script behind the "Continue with Google" button.

● Dependency failed to load — timed out after 8s

If Google Identity Services is blocked, no Google button appears here.

Dependency

Loads from

Expected in China

Google Sign-In

`accounts.google.com`

The 'Continue with Google' button does not render or does nothing when clicked because the Google Identity script is blocked.

MAPS, MEDIA, EMBEDS

YouTube embed.

A standard YouTube iframe embed — the most common way marketing sites show a product video.

● Dependency failed to load — timed out after 8s

If YouTube is blocked, the area above stays black/blank.

Dependency

Loads from

Expected in China

YouTube embed

www.youtube.com

The video area stays blank — the player chrome and thumbnail never load because youtube.com and ytimg.com are unreachable.
